-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 3 is rejected under 35 U.S.C. 102(e) as being anticipated by Shore et al. (Patent Application Publication US 2003/0011692 A1).

The microprocessor storing the distance from the range finder 301 in the embodiment shown in Figs. 19-24 inherently requires a storage device to store the distance value, which represents a desired position of the focus lens. Shore et al. discloses the focus present acquiring device as a potentiometer or pulse encoder or Hall element whose outputs are converted to a digital format to be input to the microprocessor. The display device is shown in Figs. 20-23 showing how the focused stored position (distance value from the rangefinder) and the present lens position are close to each other.

Allowable Subject Matter

3. Claims 1 and 2 are allowed.
4. Claims 4 and 5 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2851

Reasons for Indication of Patentability

5. The primary reason for indication of patentability of claims 1 and 2 is the claim 1 limitation for referencing the recorded auto focus position on a display device when the manual focus drive executes focusing. The primary reason for indicating patentability of claims 3 and 4 is the claim 3 limitation for changing the display state when the difference between the present focus state and the stored desired focus position is smaller than a predetermined threshold.

Telephone Numbers

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William B. Perkey whose telephone number is (571) 272-2126. The examiner can normally be reached on Monday-Thursday 7:00am-5:30pm.
